Foldable stacking crates

We are a reliable, innovative and independent partner that understands what is important in the relationship between the greenhouse constructor and grower. At Alcomij we've been playing to our strengths since 1969: developing and manufacturing products such as durable foldable steel stacking crates!

Stacking crates

For many years, Alcomij has been producing steel crates for the storage and distribution of plastic packaging specially for the food industry. These multifunctional hot-dip galvanised steel crates can be completely dismantled, which is convenient when the crates are not in use and there is less storage and/or transport volume available.

However, dismantling the existing crates and putting them back together again is a labour-intensive and therefore expensive process. So it's time for a change!

The foldable stacking crate

Alcomij's foldable stacking crate is based on the wishes and requirements for food safety, permitted loads, health & safety and efficiency! Like its predecessor, this steel stacking crate is hot-dip galvanised and can also be divided into two layers by means of 'stack racking'. The new crate is fully interchangeable with the old steel crate so the transition from the old to the new crate can take place gradually.

What's new?

As referred to above, during the development process due care was taken with the permitted loads and the health & safety and efficiency requirements. As a result, the foldable stacking crate is fitted with smaller meshes, a collapsible head rack on two sides, an easy-to-manoeuvre locking system and a smart and flexible folding system so that the crate can easily and quickly be folded and unfolded by 1 person.

The new crate fully complies with NEN-EN 13626. When folded out, this steel crate measures 1200x1000x1200mm and can be folded back to 1200x1000x370mm. It also has a larger sticker plate and a fixed location for barcode and/or tag labels.
